

StarT SUPPORTS INTERDISCIPLINARY PROJECT BASED LEARNING

- **StarT** encourages children and youngsters to science, technology and mathematics through project based learning by giving **visibility for their projects** and **awarding the best project teams** and their supervisors. The grand prize is a trip to Finland!
- With support from StarT learning communities share ideas and best practices for carrying out **interdisciplinary, phenomenon-based, student centred, and collaborative project based learning**
- **International sharing of the joy of learning:** 500 projects and over 100 best educational practices from 20 countries around the world participated in StarT in 2017–2018!
- The best teams will receive the **International LUMA StarT Award 2019** at the StarT gala in Finland!

Join our international StarT family today to share and learn through project based learning!
